The Language of Pictures in Print Media Advertising Wilfried Pichler, 2002-03-07 Inhaltsangabe: Abstract: Today we observe a development in which the role of language is steadily decreasing whereas the impact of pictures is increasing. This goes hand in hand with a development in which information relies more and more on visual concepts. More and more language takes the part of explaining how to read the visual presentations, more and more language takes the part of providing the background information which is necessary to understand the meaning of the visual foreground. Kress and van Leeuwen (1998) argue that Today, we seem to move towards a decrease of control over language (e.g. the greater variety of accents allowed on the public media, the increasing problems in enforcing normative spelling), and towards an increase in codification and control over the visual (e.g. the use of image banks from which ready-made images can be drawn for the construction of visual texts, and, generally, the effect of computer imaging technology). Although we may be aware of this tendency, we have not been taught in school how to read visual concepts and so most of us share some degree of illiteracy concerning a critical reading of information presented by images. This is remarkable because we all agree about their influence on our lives but at the same time when we do not develop analytical tools for describing what kinds of strategies, what kinds of concepts are working in visual presentations of information. We tend to overlook the importance of visual concepts simply because we generally do not know enough about their code. This paper analyses photos and language which are parts of ads, which have definitely been designed for transferring messages because they have been made to advertise one specific product. Images and the text of advertisements never are casual products like family pictures. Although the photo in the family album is coded its coding is less elaborated than the coding of pictures in ads. We have to keep in mind that many people, experts in advertising, experts in public relations were involved in the process of designing an ad before we can look at the final result. This is why ads are definitely conceptually designed because they are meant to create a specific meaning in the viewer's mind. It is a truism that no visual concept, no photo of an ad was chosen by chance. Photographs and language of ads are more likely to have been carefully constructed and selected according to the meaning they are supposed to create. This is [...]

Picture Perception in Animals Joel Fagot, 2013-06-17 Animal researchers commonly present pictures to their subjects, usually birds or monkeys, in order to infer how natural objects are perceived and conceptualised, or to discover the brain mechanisms underlying these abilities. This unique book questions the premise of this experimental approach and asks whether or not pictures can be considered as ecologically valid and realistic stimuli for animals. Leading researchers in comparative psychology and neuroscience address such questions as: Can animals recognise objects of scenes in pictures despite variations in viewpoints?; How do animals perceive faces? and Is there an equivalence, in animals' minds, between pictures and the objects they represent?. The result is an authoritative and cutting-edge survey of current knowledge in the field, which underlines the advantages, limits and risks of using pictures to infer cognitive abilities or brain mechanisms in animal studies. *Picture Perception in Animals* will be essential reading for comparative psychologists, anthropologists, and neuroscientists working in picture perception.

Motion Picture Directing: The Facts and Theories of the Newest Art Peter Milne, 2021-05-19 A motion picture is an incredibly effective medium for delivering drama, specifically in the evocation of emotion. This art is highly complicated, requiring contributions from nearly all the other arts and countless technical skills. Appearing at the end of the 19th century, this new art form became one of the most famous and influential media of the 20th century and after. 'Motion Picture Directing' is a helpful piece by American screenwriter Peter Milne to reduce the complexity of this art by making several things easy to understand. The author writes wonderfully about the developments, the abilities, characteristics, and essential qualities after spending nearly ten years in the motion picture industry as a critic and writer. He gives valuable insights into the various methods and techniques that were used during that time in the field. It proves helpful to budding directors and the skilled ones as an introduction to the history of directing.

Big Picture, Small Screen John Hill, Martin McLoone, 1996 This work features contributions from academics and media professionals who ask: what is the history of involvement between film and television in the US, Europe, Britain and Ireland; what are the sources of television finance for film; and what are the consequences for the type of film made?

Jeff Wall and the Concept of the Picture Naomi Merritt, 2020-12-30 This book grapples with fundamental questions about the evolving nature of pictorial representation, and the role photography has played in this ongoing process. These issues are

explored through a close analysis of key themes that underpin the photography practice of Canadian artist Jeff Wall and through examining important works that have defined his oeuvre. Wall's strategic revival of 'the picture' has had a resounding influence on the development of contemporary art photography, by expanding the conceptual and technical frameworks of the medium and introducing a self-reflexive criticality. Naomi Merritt brings a new and original contribution to the scholarship on one of the most significant figures to have shaped the course of contemporary art photography since the 1970s and shines a light on the multilayered connections between photography and art. This book will be of interest to scholars in the history of photography, art and visual culture, and contemporary art history.

Persian Pictures Gertrude Lowthian Bell,2005 Here in the dust and the sunshine is an epitome of the living East, and standing unnoticed in a doorway, you will admit that you have not travelled in vain. But as the procession of people files past you, you will realize what a gulf lies between you. The East looks to itself; it knows nothing of the greater world of which you are a citizen, asks nothing of you and your civilization. This brilliant, vivid and impressionistic series of sketches, formed during her 1892 stay in Persia, is Gertrude Bell's first published work. Infused with a distinctive orientalism, *Persian Pictures* is an evocative, virtuosic meditation, moving sinuously between Persia's heroic complex, mythical past and present decline; the public face of Tehran and the otherworldly secret, mysterious life of the East; the lives of its women; its enclosed, quasi-medieval gardens; from the bustling cities to the lonely wastelands of Khorasan. Bell's documentation of Muharram - the month of mourning for Imam Hussein, the grandson of the Prophet Mohammed - and Ramadan, display a mind finely attuned to the differences and similarities between Islam and Christianity, East and West. *Persian Pictures* is both travelogue and meditation, an elegaic and beautifully observed account of a spellbinding land. Scholar, historian, linguist, archaeologist, photographer, secret service agent and traveller, Gertrude Bell (1868-1926) was a hugely significant figure. Her early travels were made in Europe and Persia; she made two round-the-world trips (1897-8 and 1902-3), while her climbing exploits in the Alps from 1899-1904 earned her renown as a mountaineer. Like other British 'orientalists' of the early 20th century, she explored the Ottoman Empire during and after World War I and was hugely instrumental in the post-war reconfiguration of the Arab states in the Middle East. She was a prime mover in creating the new state of Iraq and establishing a constitutional monarchy there with a parliament, civil service and legal system; as Honorary Director of Antiquities in Iraq, she established the Iraq Museum in Baghdad.

Pictures of Hollis Woods Patricia Reilly Giff,2008-12-30 This Newbery Honor book about a girl who has never known

family fighting for her first true home “will leave readers . . . satisfied” (Kirkus Reviews). Hollis Woods is the place where a baby was abandoned is the baby’s name is an artist is now a twelve-year-old girl who’s been in so many foster homes she can hardly remember them all. When Hollis is sent to Josie, an elderly artist who is quirky and affectionate, she wants to stay. But Josie is growing more forgetful every day. If Social Services finds out, they’ll take Hollis away and move Josie into a home. Well, Hollis Woods won’t let anyone separate them. She’s escaped the system before; this time, she’s taking Josie with her. Still, even as she plans her future with Josie, Hollis dreams of the past summer with the Regans, fixing each special moment of her days with them in pictures she’ll never forget. Patricia Reilly Giff captures the yearning for a place to belong in this warmhearted story, which stresses the importance of artistic vision, creativity, and above all, family.

The World's Painters and Their Pictures Deristhe Levinte Hoyt,2015-06-04 Excerpt from The World's Painters and Their Pictures The present universal interest in the subject of historic art and the indications that very soon it will hold equal importance in our school curriculums with those of general history and literature, are sufficient excuse for the making of a new book which treats of the world's painters and paintings. It is hoped that the volume will be of especial usefulness to young students of the subject, to whom it has been carefully adapted, as well as to the general reader. In it reference will be found to painters of greatest note in the history of art, a careful analysis of the characteristics of their work, and abundant and well-arranged information concerning their most noted pictures, - all in accordance with the decisions of the latest and most authoritative criticism. This latter feature will be found of unusual service to those who are preparing to visit the picture galleries of the Old World. The significance of colors as used by the old masters and the emblems by which saints and other sacred personages, when found in an old picture, may be readily recognized, as well as the pronouncing vocabulary of artists' names, are useful features of the book. It also contains a list of pictures which have grown familiar to the public through reproduction, together with names of their painters and the places where they are to be found.
