*Dune Messiah* Frank Herbert,2020-07-07 Book Two in the Magnificent Dune Chronicles—the Bestselling Science Fiction Adventure of All Time *Dune Messiah* continues the story of Paul Atreides, better known—and feared—as the man christened Muad'Dib. As Emperor of the known universe, he possesses more power than a single man was ever meant to wield. Worshipped as a religious icon by the fanatical Fremen, Paul faces the enmity of the political houses he displaced when he assumed the throne—and a conspiracy conducted within his own sphere of influence. And even as House Atreides begins to crumble around him from the machinations of his enemies, the true threat to Paul comes to his lover, Chani, and the unborn heir to his family's dynasty...

Country Music Dayton Duncan,Ken Burns,2019-09-10 The rich and colorful story of America's most popular music and

the singers and songwriters who captivated, entertained, and consoled listeners throughout the twentieth century--based on the upcoming eight-part film series to air on PBS in September 2019 This gorgeously illustrated and hugely entertaining history begins where country music itself emerged: the American South, where people sang to themselves and to their families at home and in church, and where they danced to fiddle tunes on Saturday nights. With the birth of radio in the 1920s, the songs moved from small towns, mountain hollers, and the wide-open West to become the music of an entire nation--a diverse range of sounds and styles from honky tonk to gospel to bluegrass to rockabilly, leading up through the decades to the music's massive commercial success today. But above all, Country Music is the story of the musicians. Here is Hank Williams's tragic honky tonk life, Dolly Parton rising to fame from a dirt-poor childhood, and Loretta Lynn turning her experiences into songs that spoke to women everywhere. Here too are interviews with the genre's biggest stars, including the likes of Merle Haggard to Garth Brooks to Rosanne Cash. Rife with rare photographs and endlessly fascinating anecdotes, the stories in this sweeping yet intimate history will captivate longtime country fans and introduce new listeners to an extraordinary body of music that lies at the very center of the American experience.

**The Jetsetters** Amanda Eyre Ward,2020 When seventy-year-old Charlotte Perkins submits a sexy essay to the Become a Jetsetter contest, she dreams of reuniting her estranged children: Lee, an almost-famous actress; Cord, a handsome Manhattan venture capitalist who can't seem to find a bride; and Regan, a harried mother who took it all wrong when Charlotte bought her a Weight Watchers gift certificate for her birthday. Charlotte yearns for the years when her children were young and she was a single mother who meant everything to them. When she wins the cruise, the family packs all their baggage--literal and figurative--and spends ten days traveling from sun-drenched Athens through glorious Rome to tapas-laden Barcelona on an over-the-top cruise ship, the Splendido Marveloso. As lovers new and old join the adventure, long-buried secrets are revealed, and the Perkins family is forced to confront the defining choices in their lives. Can four lost adults find the peace they've been seeking by reconciling their childhood aches and coming back to each other? In the vein of *The Nest* and *The Vacationers*, Ward has created a delicious and intelligent novel about the courage it takes to reveal our

true selves, the pleasures and perils of family, and how we navigate the seas of adulthood to cruise--we can only hope--toward joy--

*Similarity Search* Pavel Zezula, Giuseppe Amato, Vlastislav Dohnal, Michal Batko, 2006-06-07 The area of similarity searching is a very hot topic for both research and commercial applications. Current data processing applications use data with considerably less structure and much less precise queries than traditional database systems. Examples are multimedia data like images or videos that offer query by example search, product catalogs that provide users with preference based search, scientific data records from observations or experimental analyses such as biochemical and medical data, or XML documents that come from heterogeneous data sources on the Web or in intranets and thus does not exhibit a global schema. Such data can neither be ordered in a canonical manner nor meaningfully searched by precise database queries that would return exact matches. This novel situation is what has given rise to similarity searching, also referred to as content based or similarity retrieval. The most general approach to similarity search, still allowing construction of index structures, is modeled in metric space. In this book. Prof. Zezula and his co authors provide the first monograph on this topic, describing its theoretical background as well as the practical search tools of this innovative technology.

Though she becomes deeply bonded to her new family, Lavinia is also slowly accepted into the world of the big house, where the master is absent and the mistress battles opium addiction. As time passes she finds herself perilously straddling two very different worlds and when loyalties are brought into question, dangerous truths are laid bare and lives are at risk.--
