American-Type Options Dmitrii S. Silvestrov, 2015-03-03 The book gives a systematical presentation of stochastic approximation methods for discrete time Markov price processes. Advanced methods combining backward recurrence algorithms for computing of option rewards and general results on convergence of stochastic space skeleton and tree approximations for option rewards are applied to a variety of models of multivariate modulated Markov price processes. The principal novelty of presented results is based on consideration of multivariate modulated Markov price processes and general pay-off functions, which can depend not only on price but also an additional stochastic modulating index component, and use of minimal conditions of smoothness for transition probabilities and pay-off functions, compactness conditions for log-price processes and rate of growth conditions for pay-off functions. The volume presents results on structural studies of optimal stopping domains, Monte Carlo based approximation reward algorithms, and convergence of American-type options for autoregressive and continuous time models, as well as results of the corresponding experimental studies.

Wings of Ebony J. Elle,2021-01-26 Instant New York Times bestseller! “A remarkable, breathtaking, earthshaking, poetic thrillride.” —Daniel José Older, New York Times bestselling author of Shadowshaper In this riveting, keenly emotional debut fantasy, a Black teen from Houston has her world upended when she learns about her godly ancestry and must save both the human and god worlds. Perfect for fans of Angie Thomas, Tomi Adeyemi, and The Hunger Games! “Make a way out of no way” is just the way of life for Rue. But when her mother is shot dead on her doorstep, life for her and her younger sister changes forever. Rue’s taken from her neighborhood by the father she never knew, forced to leave her little sister behind, and whisked away to Ghizon—a hidden island of magic wielders. Rue is the only half-god, half-human there, where leaders protect their magical powers at all costs and thrive on human suffering. Miserable and desperate to see her sister on the anniversary of their mother’s death, Rue breaks Ghizon’s sacred Do Not Leave Law and returns to Houston, only to discover that Black kids are being forced into crime and violence. And her sister, Tasha, is in danger of falling sway to the very forces that claimed their mother’s life. Worse still, evidence mounts that the evil plaguing East Row is the same one that lurks in Ghizon—an evil that will stop at nothing until it has stolen everything from her and everyone she loves. Rue must embrace her true identity and wield the full magnitude of her ancestors’ power to save her neighborhood before the gods burn it to the ground.

L Tokyo Jacob Aue Sobol,2008 Magnum photographer Jacob Aue Sobol moved to Tokyo in Spring 2006. He began photographing in the streets and public areas, drawn to the tightly confined reality of the city. His search was for the individual human being in an environment simultaneously attractive and repellant. He hung out with the rent boys in Kabukicho, the red light district. He visited the homeless sleeping in the streets and the parks. Most of all, he sought to understand Japanese youth, the generation which lacks any connection to traditional Japanese culture and values.

A Detroit Nocturne Dave Jordano, Karen Irvine, 2018-04-17 In a continuation of Dave Jordano's critically-acclaimed *Detroit: Unbroken Down* (powerHouse Books, 2015), which documented the lives of residents, *Detroit Nocturne* is an artist's book not of people this time, but instead the places within which they live and work: structures, dwellings, and storefronts. Made at night, these photographs speak to the quiet resolve of Detroit's neighborhoods and its stewards: independent shop proprietors and home owners who have survived the long and difficult path of living in a post-industrial city stripped of economic prosperity and opportunity. In many rust-belt cities like Detroit, people's lives often hang in the balance as neighborhoods support and provide for each other through job creation, ad-hoc community involvement, moral and spiritual support, and a well-honed Do-It-Yourself attitude. With all the media attention about Detroit's rebirth and revival, it is important to note that many neighborhoods throughout the city have managed to survive against the odds for years, relying on local merchants and businesses that operate on a cash only basis who have stuck it out through decades of economic decline. Determination and a strong sense of self-preservation: Detroit's citizens manage to survive by maintaining a healthy sense of connection without the fear of giving up. All of these places of business and residences, whether large or small, are in many ways symbols representing the ongoing story that is Detroit, and a testament to the tenacity of those who are trying desperately to hold on to what is left of the social and economic fabric of the city. These photographs speak to that truth without casting an overly sentimental gaze. These nocturnal images offer a chance to view the locations in an unfamiliar light, and offer a moment of quiet and calm reflection.

French London Saskia Huc-Hepher, 2021-06-15 Who are the people that make up London's French community and why did they choose to leave France and settle in London? How is 'Frenchness' played out in physical and digital diasporic spaces? And what impact has Brexit had on French Londoners' sense of belonging, identity and embeddedness? French

London offers an unprecedented perspective on the everyday lived experience of French migrants in London. Based on years of immersive on-land and on-line empirical enquiry, the book uncovers the motivations underlying mobility from France and the appeal of London as a long-term home. Through the individual (hi)stories of a diverse group of French Londoners and an ethnosemiotic analysis of blogs and websites, London emerges as a place of liberation and openness, where migrants are free from inequalities encountered in the birthplace of l'égalité, whether in education, work or wider society. This volume explores the messy complexity and paradoxical ambivalence of cross-Channel mobility, including here-there, explicit-implicit, physical-digital, subject-object and reinvention-reproduction dichotomies. Structured around Pierre Bourdieu's concepts of symbolic violence and habitus, the book considers how apparently pragmatic mobility decision-making is often underpinned by powerful social, affective and pre-reflective factors. Its subdivision of habitus into three interrelated components - habitat, habituation and habits - provides an enlightening conceptual lens to examine participants' material lifeworlds, the gradual creep of settlement, and a 'common-unity' of practice. From schooling and healthcare to eating and drinking, the migrants' evolving behaviours, attitudes, identities and belongings are expertly scrutinised. Spanning pre- and post-Brexit periods, this timely book gives voice to a largely neglected minority and offers a linguistically and culturally sensitive insight into French migrants' on-land trajectories and on-line representations.

Buffy the Vampire Slayer - the Making of a Slayer Nancy Holder, 2012 Buffy, created by Joss Whedon and featuring the titular ass-kicking heroine and her Scooby Gang of friends as they fight vampires and other supernatural horrors in their home town, celebrates its 15th birthday in 2012. This fullcolour, lavishly illustrated book includes quotes from the cast and crew and behind the scenes tidbits from all seven seasons of the show and beyond.

Arteriogenesis and Therapeutic Neovascularization Elisabeth Deindl, Paul H. A. Quax, Thomas Schmitz-Rixen, 2020-11-04 For many years, arteriogenesis, also called collateral formation, has been regarded as being a beneficial process to restore blood flow to distal tissues in occluded arteries. Therefore, it is frequently referred to in relation to therapeutic angiogenesis. Despite the big clinical potential and the many promising clinical trials on arteriogenesis and therapeutic angiogenesis, the exact molecular mechanisms involved in the multifactorial processes of arteriogenesis are still not completely understood. A better understanding is needed in order to define successful clinical therapies. In this Special Issue, multiple aspects of arteriogenesis and therapeutic angiogenesis will be addressed, ranging from the role of inflammatory processes and immune cells, to growth factors, microRNAs and environmental factors like hypoxia. Therapeutic angiogenesis will also be discussed in relation to the atherosclerosis and intraplaque angiogenesis in hypoxic lesions, as well as specific forms of arteriogenesis in relation to spinal cord blood supply and aorta surgery. The effects of exercise, a frequently prescribed therapy for PAD patients, on arteriogenesis are also discussed. Overall, the papers in this Special Issue on arteriogenesis and therapeutic angiogenesis provide important new insights in the underlying pathophysiological mechanism of these complex processes

and may be helpful to define a successful future intervention directed at therapeutic angiogenesis.
