American-Type Options Dmitrii S. Silvestrov, 2015-03-03 The book gives a systematical presentation of stochastic approximation methods for discrete time Markov price processes. Advanced methods combining backward recurrence algorithms for computing of option rewards and general results on convergence of stochastic space skeleton and tree approximations for option rewards are applied to a variety of models of multivariate modulated Markov price processes. The principal novelty of presented results is based on consideration of multivariate modulated Markov price processes and general pay-off functions, which can depend not only on price but also an additional stochastic modulating index component, and use of minimal conditions of smoothness for transition probabilities and pay-off functions, compactness conditions for log-price processes and rate of growth conditions for pay-off functions. The volume presents results on structural studies of optimal stopping domains, Monte Carlo based approximation reward algorithms, and convergence of American-type options for autoregressive and continuous time models, as well as results of the corresponding experimental studies.

Ultra Low-Power Integrated Circuit Design for Wireless Neural Interfaces Jeremy Holleman, Fan Zhang, Brian Otis, 2010-10-29 This book will describe ultra low-power, integrated circuits and systems designed for the emerging field of neural signal recording and processing, and wireless communication. Since neural interfaces are typically implanted, their operation is highly energy-constrained. This book introduces concepts and theory that allow circuit operation approaching the fundamental limits. Design examples and measurements of real systems are provided. The book will describe circuit designs for all of the critical components of a neural recording system, including: Amplifiers which utilize new techniques to improve the trade-off between good noise performance and low power consumption. Analog and mixed-signal circuits which implement signal processing tasks specific to the neural recording application: Detection of neural spikes Extraction of features that describe the spikes Clustering, a machine learning technique for sorting spikes Weak-inversion operation of analog-domain transistors, allowing processing circuits that reduce the requirements for analog-digital conversion and allow low system-level power consumption. Highly-integrated, sub-mW wireless transmitter designed for the Medical Implant Communications Service (MICS) and ISM bands.

Citizens and Rulers of the World Mahshid Mayar, 2022-02-16 By delving into the complex, cross-generational exchanges that characterize any political project as rampant as empire, this thought-provoking study focuses on children and their ambivalent, intimate relationships with maps and practices of mapping at the dawn of the American Century. Considering children as students, map and puzzle makers, letter writers, and playmates, Mahshid Mayar interrogates the ways turn-of-the-century American children encountered, made sense of, and produced spatial narratives and cognitive maps of the United States and the world. Mayar further probes how children's diverse patterns of consuming, relating to, and appropriating the truths that maps represent turned cartography into a site of personal and political contention. To investigate where in the world the United States imagined itself at the end of the nineteenth century, this book calls for new modes of mapping the United States as it studies the nation on regional, hemispheric, and global scales. By examining the multilayered liaison between imperial pedagogy and geopolitical literacy across a wide range of archival evidence, Mayar delivers a careful microhistorical study of U.S. empire.

Global Economic Prospects 2007 World Bank, 2006 Over the next 25 years developing countries will move to center stage in the global economy. *Global Economic Prospects 2007* analyzes the opportunities - and stresses - this will create. While rich and poor countries alike stand to benefit, the integration process will make more acute stresses already apparent today - in income inequality, in labor markets, and in the environment. Over the next 25 years, rapid technological progress,

burgeoning trade in goods and services, and integration of financial markets create the opportunity for faster long-term growth. However, some regions, notably Africa, are at risk of being left behind. The coming globalization will also see intensified stresses on the global commons. Addressing global warming, preserving marine fisheries, and containing infectious diseases will require effective multilateral collaboration to ensure that economic growth and poverty reduction proceed without causing irreparable harm to future generations.

Unmasking What Matters Sandra Joseph,2018-01-23 #1 International Best Seller Living a meaningful, satisfying life is an enigma for most people today. We feel stuck, small, without the self-confidence to move in the direction of what we really want. Or, if we do muscle through our fear in pursuit of our dreams, we exhaust ourselves working and striving and achieving and yet somehow, no matter our level of outer-world success, are left dazed and disheartened, asking ourselves, “Is this all there is?” After ten years on Broadway, Sandra Joseph—the longest-running leading lady in Broadway’s longest-running show, *The Phantom of the Opera*—knows one thing for sure: the only way to have a truly fulfilling life and achieve success that satisfies is to recognize that the journey up is no substitute for the journey in. In *Unmasking What Matters*, Joseph uses lessons learned on the road to Broadway, during her decade as Christine, and through the challenges she faced after walking away from the business to show readers how to courageously bring their inner voice to the outer world, stop seeking success for achievement’s sake and start creating the life they truly desire. With her hard-won wisdom, poignant personal stories, and practical, experiential exercises to guide them, readers will learn to shed their limiting masks, mindfully work through their fears, stand in their authentic power, and build a life rich with satisfaction, meaning, and significance. Warm, humble, encouraging, and inspiring, *Unmasking What Matters* can help anyone move from stuck, fearful, and playing it safe to embracing their passions, gifts, and opportunities and living life “full-out” today.

Introduction to Logic and Theory of Knowledge Edmund Husserl, 2008-08-26 Claire Ortiz Hill The publication of all but a small, unbound, part of the complete text of the lecture course on logic and theory of knowledge that Edmund Husserl gave at Göttingen during the winter semester of 1906/07 became a reality in 1984 with the publication of *Einleitung in die Logik und Erkenntnistheorie, Vorlesungen 1906/07* edited by Ullrich Melle. Published in that volume were also 27 appendices containing material selected to complement the content of the main text in significant ways. They provide valuable insight into the evolution of Husserl's thought between the *Logical Investigations* and *Ideas I* and, therefore, into the origins of phenomenology. That text and all those appendices but one are translated and published in the present volume. Omitted are only the "Personal Notes" dated September 25, 1906, November 4, 1907, and March 6, 1908, which were translated by Dallas Willard and published in his translation of Husserl's *Early 2 Writings in the Philosophy of Logic and Mathematics*. *Introduction to Logic and Theory of Knowledge, Lectures 1906/07* provides valuable insight into the development of the ideas fundamental to phenomenology. Besides shedding considerable light on the genesis of phenomenology, it sheds needed light on many other dimensions of Husserl's thought that have puzzled and challenged scholars.
